REACT FOR GOOD

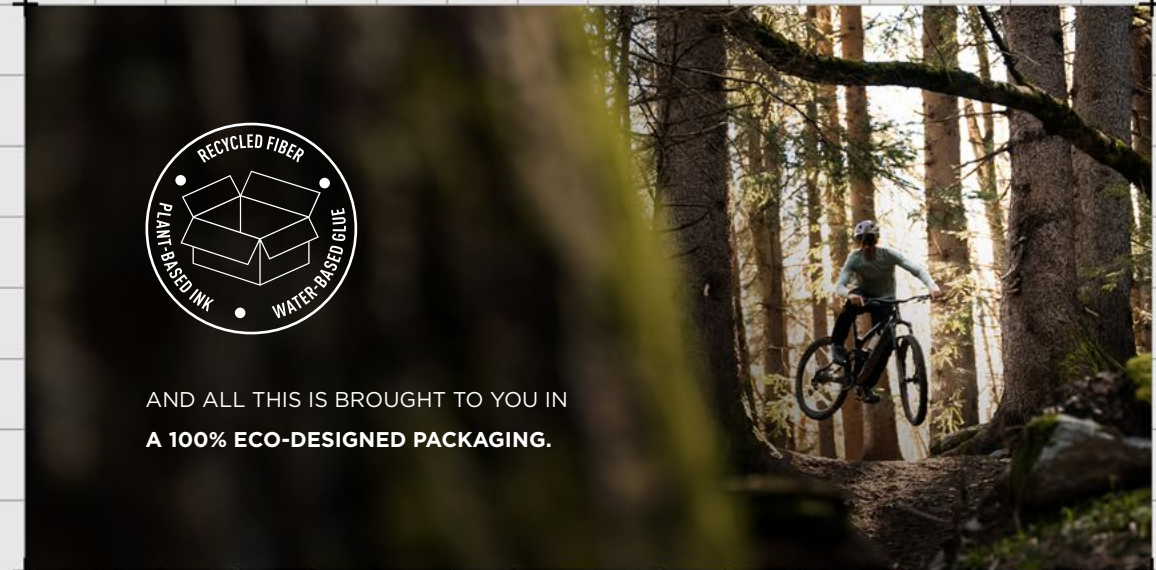

AT BOLLÉ, IT'S ALL ABOUT **INNOVATIVE DESIGN AND MORE SUSTAINABLE CHOICES**. WE DEVELOP HIGHLY **INNOVATIVE PRODUCTS MADE WITH RENEWABLE OR RECYCLED MATERIALS**.

AS ONE OF THE LEADERS IN THIS FIELD, BOLLÉ LAUNCHES 9 ECO-DESIGNED* SUNGLASSES AND 3 ECO-DESIGNED OPHTHALMIC GLASSES, **BRINGING THE ECO-DESIGNED APPROACH TO 100% OF THE SUNGLASSES COLLECTION AND 88% OF THE OPHTHALMIC COLLECTION**.

SUPPORTED BY A **GLOBAL CAMPAIGN CALLED "REACT FOR GOOD"**, BOLLÉ'S SUSTAINABLE EFFORTS, AIMING FOR 90% OF THE RANGE TO BE ECO-DESIGNED BY 2027, HAVE BEEN VALIDATED BY **THE RECENT B CORP CERTIFICATION**. ALL DETAILS AND INFO CAN BE FOUND IN THE COMPANY'S SUSTAINABLE DEVELOPMENT REPORT.

BRAND HISTORY

1888

A FAMILY BUSINESS

Seraphin Bollé created the brand Bollé; known at this time as one of the first company to use newly developed celluloid, which becomes the basis for Bollé products during those early decades.

1960

SKI GOGGLES

Ski goggles were first marketed by Bollé.

2015

CYCLING HELMETS

Launch of the cycling helmets line.

2018

Launch of the best sport lens ever.

2023

AVIO

Highest performance road cycling helmet.

1936

SUNGLASSES

The brand launches its first sunglasses and becomes quickly the pioneer of molded Nylon.

2007

SKI HELMETS

Launch of the first line of ski helmets. A front-line player in the winter sports landscape.

2021

A revolutionary high-contrast lens.

2021 - 2024

REACT FOR GOOD

Launch of a full eco-designed cycling range.

COLORIA

The AVIO is Bollé's ultimate high-performance road helmet. The fastest cycling helmet ever designed by the brand has it all. Ultra-lightweight thanks to its EPS design, lightweight in-molded components and optimized fit system, it features MIPS® AIR, MIPS's most lightweight brain protection system. Super ventilated, the AVIO is designed to align both deep internal channeling and large front vents with small exhaust ports that create low pressure at the rear of the helmet for extra air circulation. Developed to make you faster with cutting-edge aerodynamics, the AVIO has an optimized low-profile shape and is equipped with the AVID Aero Progressive EPS to direct airflows and manage impact energy. Conceived to reduce drag thanks to its Kamm Tail at the rear, the AVIO is all about details with an Opti-Dock designed to securely hold all-sized sunglasses and even a ponytail compatibility. A new generation of helmets with no compromise.

PERFORMANCE REDEFINED

The AVIO MIPS is Bollé's most advanced high-performance road cycling helmet we've ever created. A balance of lightness, ventilation, aerodynamics, and comfort while maintaining the strict requirements involved with helmet certification. Numerous design iterations were necessary to balance these attributes into a single helmet. The result is the most lightweight, ventilated, aerodynamic helmet Bollé has ever designed.

STRIKE-CAGE TECHNOLOGY

The strike-cage reinforces the helmet structure and pushes the limits of vent sizing that impact certification would allow. Large front vents are aligned with small rear exhaust ports to create a low-pressure zone at the rear of the helmet. This low pressure pulls air through the helmet keeping the rider's head cool.

OPTI-DOCK

With Bollé's deep history of eyewear design and development, we made sure to have a dedicated place to stow your eyewear. The Opti-Dock storage system has been designed with flexible rubber fins that securely hold frames of all sizes and styles without temples contacting your head or obstructing airflow.

KAMM TAIL

Through Computational Fluid Dynamics (CFD) testing on a supercomputer, we were able to refine the helmet's geometry to minimize drag and reduce wake to create a fast aerodynamic shape.

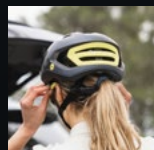

Constantly looking to optimize the weight of our helmets, we have chosen MIPS's most lightweight rotational impact solution for our AVIO helmets. The padding design reduces rotational forces during impact while giving the impression of wearing nothing.

PERFORMANCE CLICK-TO-FIT™ SYSTEM

The system has been completely redesigned to be even more comfortable, lightweight, and adjustable. Women's needs were also considered, the fit system can be lowered to accommodate a ponytail.

AVID AERO PROGRESSIVE EPS

The next generation of Bollé's AVID Progressive EPS technology combines high- and low-density impact management while directing and increasing airflow through the helmet. Deep channels and recesses inside the helmet improve airflow while lowering the density in specific areas and without compromising the ability to provide impact protection.

If you're looking to perform on any trail, the TRACKDOWN MIPS is the ultimate gear to wear. This eco-designed mountain bike and enduro helmet offers a unique set of features: the Opti-Dock designed to securely hold all-sized sunglasses, a 3-position visor allowing space for goggles and a deep coverage at the rear. The AVID Progressive EPS along with the Mips Brain Protection System allows to combine channels for superior ventilation with progressive shock absorption.

Star of our eco designed range for commuters, the HALO REACT is a must have for the urban environment. 100% recycled nylon webbing and padding fabric, plastic parts in 100% recycled nylon, cap in 100% recycled fabric and cork incorporated in the EPS are all part of our eco approach. The HALO REACT is a high end urban helmet above all designed for your safety. It is equipped with an integrated and USB rechargeable back and front LED system, easy to turn on and off with several lighting modes, to make sure you will be seen at night. At Bollé, when it comes to protection, we always look for the best so we combined our AVID Progressive EPS technology with MIPS, the best brain protection available. With the Halo React, you will stay safe at all times.

Pillar of our eco-designed commuter range, the REACT VISOR now comes with a clear visor for optimal vision and protection. The same qualities that make our helmet lightweight, comfortable and safe also make it eco-friendly. With the REACT VISOR, we are challenging the traditional way to make helmets, replacing some plastic and petroleum products with organic and recycled materials to reduce the environmental impact. We have added cork to the EPS, recycled polyamide in the fit system and used 100% recycled padding, webbing and nylon webbing divider. It's our first step to respond to the needs of cyclists who want to pursue an active lifestyle in the city while doing their part for the planet.

PHANTOM
LIGHT ADAPTIVE LENS TECHNOLOGY

ADAPTATION IS KEY

PLATINUM

A true reference in the world of eye protection, Bollé Safety offers protective glasses trusted by professional workers in demanding industries like automotive, construction, mining, or pharmaceutical. Platinum represents the highest level of expertise in anti fog and anti scratch protection.

With **Phantom**, Bollé brings this expertise to everyone. A perfect protection with a more performing anti fog and an anti scratch that last 40% more than the standard.

LIGHTWEIGHT

NXT[™] material is close to the lightest lens material available today, at 14% lighter than polycarbonate. This allows for larger designs with fuller coverage, ultimate protection and utmost comfort.

AVAILABLE IN PRESCRIPTION

Because everyone's vision is unique, Phantom lenses are available on our RX-able frames, suitable for 99% of prescriptions.

HIGH IMPACT RESISTANCE

NXT[™] lenses not only protect you 100% from harmful UV rays, but are also built for maximum impact resistance. NXT[™] is one of the strongest materials on the market. Originally adapted from military use - jet canopies and helicopter windshields - lenses are subjected to rigorous high-velocity impact tests.

OPTICAL CLARITY

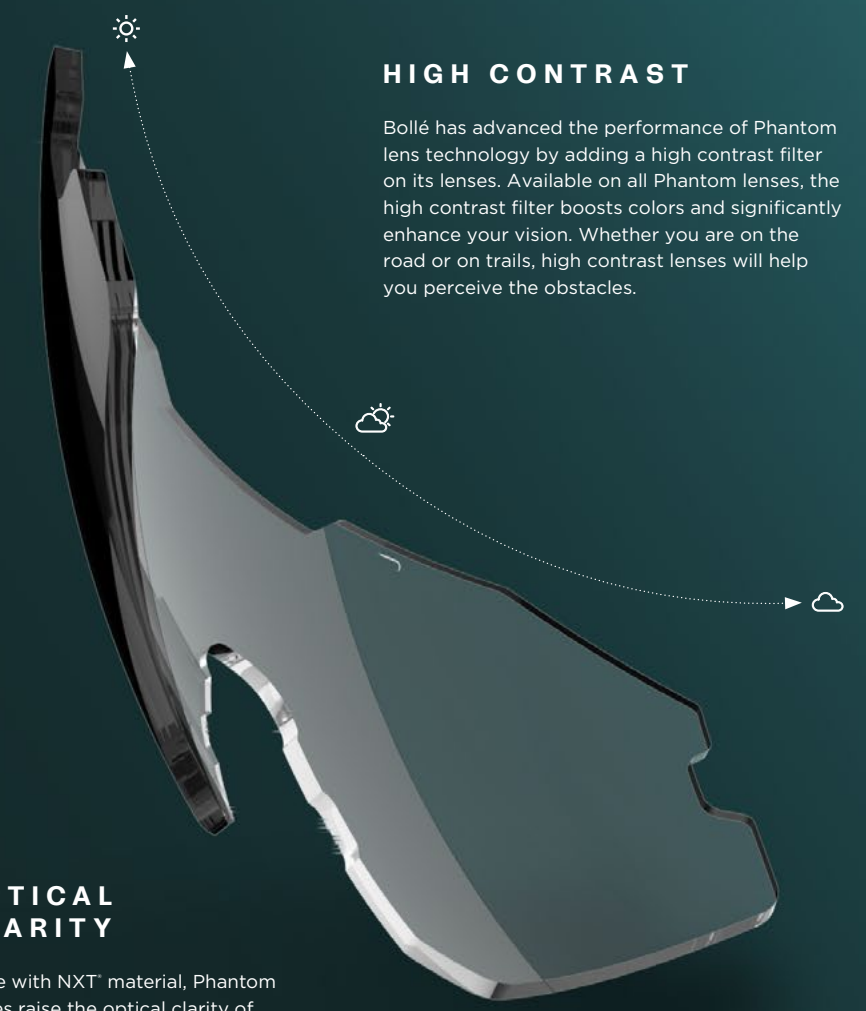

Made with NXT[™] material, Phantom lenses raise the optical clarity of our lenses to a new level. NXT[™] material is packed with a lot of features such as optimal clarity, lightweight, high impact resistance, chemical resistance, and of course 100% UV protection. Ideal for a sport use, Phantom lenses will offer maximum protection & comfort of vision for your eyes.

PHOTOCROMIC PERFORMANCE

Phantom lens technology adapts to any light condition, ensuring precise visual acuity whatever the weather. The lens tint changes with the light from cat.1 to cat.3. Enhanced vision whatever the conditions.

HIGH CONTRAST

Bollé has advanced the performance of Phantom lens technology by adding a high contrast filter on its lenses. Available on all Phantom lenses, the high contrast filter boosts colors and significantly enhance your vision. Whether you are on the road or on trails, high contrast lenses will help you perceive the obstacles.

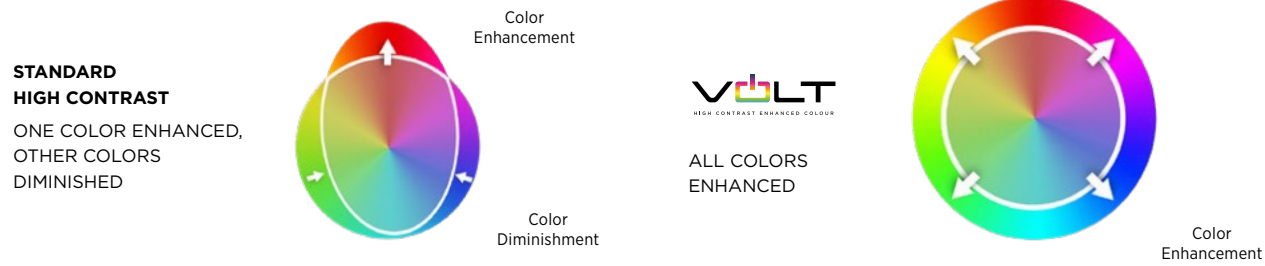

DISCOVER THE TECHNOLOGY VIDEO

THE FIRST LENS EVER DEVELOPED WITH ARTIFICIAL INTELLIGENCE.

1. Find out which wavelengths to enhance or dampen
2. Design and develop the chemical compounds (pigments) that will absorb the right wavelengths
3. Put together the perfect blend of pigments for the transmission curve we want to achieve

20 MILLION COMBINATIONS EVALUATED, 1 UNIQUE FORMULA.

THE ULTIMATE IN HIGH CONTRAST

- INCREASE DEPTH PERCEPTION**
- MAINTAIN WHITE POINT**
- 30% COLOR ENHANCEMENT**
TWICE BETTER THAN THE CLOSEST COMPETITOR (15%)
- TECHNOLOGY FROM COLOR DEFICIENCY LENS**

Volt lenses are now made of 60% bio-sourced polycarbonate.

Light and flexible, the VICTUS is our versatile multi-sports model. With its wrapped design and high-performance features, it is your best ally for all your sports activities, whether it be cycling, trail/running, tennis or golf. The half-rim dual construction combined with the Thermogrip® rubber on both the adjustable nose piece and all along the large temples offer maximum comfort and stability. A part of our React for Good campaign, the VICTUS is made of 45% bio-based material. Available with Phantom, the most advanced photochromic lens on the market and Volt+, our revolutionary high contrast polarized lens, this 8-base frame is our best-seller for prescription lenses.

A TRANSPARENT & INTUITIVE WEBSHOP

Since September 2022, a more informative and easier-to-use version of the RX webshop has been made available to opticians, to make the ordering process even smoother. You can enter the prescription details of the frame wearer and the webshop will automatically filter the available frame & lens combinations corresponding to the prescription. A lens thickness calculator also helps you to anticipate the best solution for each wearer.

Visit our webshop : <https://rx.bollebrands.com>
